ABOUT US

Fami was founded as a specialist industrial furnishing manufacturer. Over the years, considerable resources and energy have been invested in growing our professional skills, establishing an impressive network of contacts and transforming research and materials into highly functional, innovative and top quality products. Fami is a solid business organisation with a number of production divisions operating from a location of 230 thousand square meters, buildings of 95 thousand square meters and employs over 400 people. We have six subsidiaries abroad, in Germany, Poland, Austria, Switzerland, China and Argentina. Our authorised distributor network covers every major country in Europe, South East Asia, the Middle East and Latin America. Every year we transform over eight million kilograms of iron and steel and two million kilograms of raw plastic into industry leading storage solutions. All of our production processes take place in house and there is a specific division focused on the production, transformation and molding of plastics.

ECO-SUSTAINABILITY

Eco Sustainability and sustainable development are issues of great importance arising from the increased awareness that the changes and renewals that need to be accomplished should be done with respect to the environmental balance and above all that our resources are precious and need to be conserved for future generations.
Fami S.r.l is constantly studying new technological innovations and is a forerunner in the industrial furniture manufacturing in implementing sustainable solutions. FAMI has installed a 1.4 mWp photovoltaic plant on the factory rooftops with a surface area of over 45.000sq meters. The systems consists of 6140 polycrystalline silicon panels known for their high quality, efficiency and longevity and guaranteed for 25 years. The photovoltaic system produces over 44% of the yearly electrical demand of the company.
Many advantages have led Fami to install a photovoltaic system:

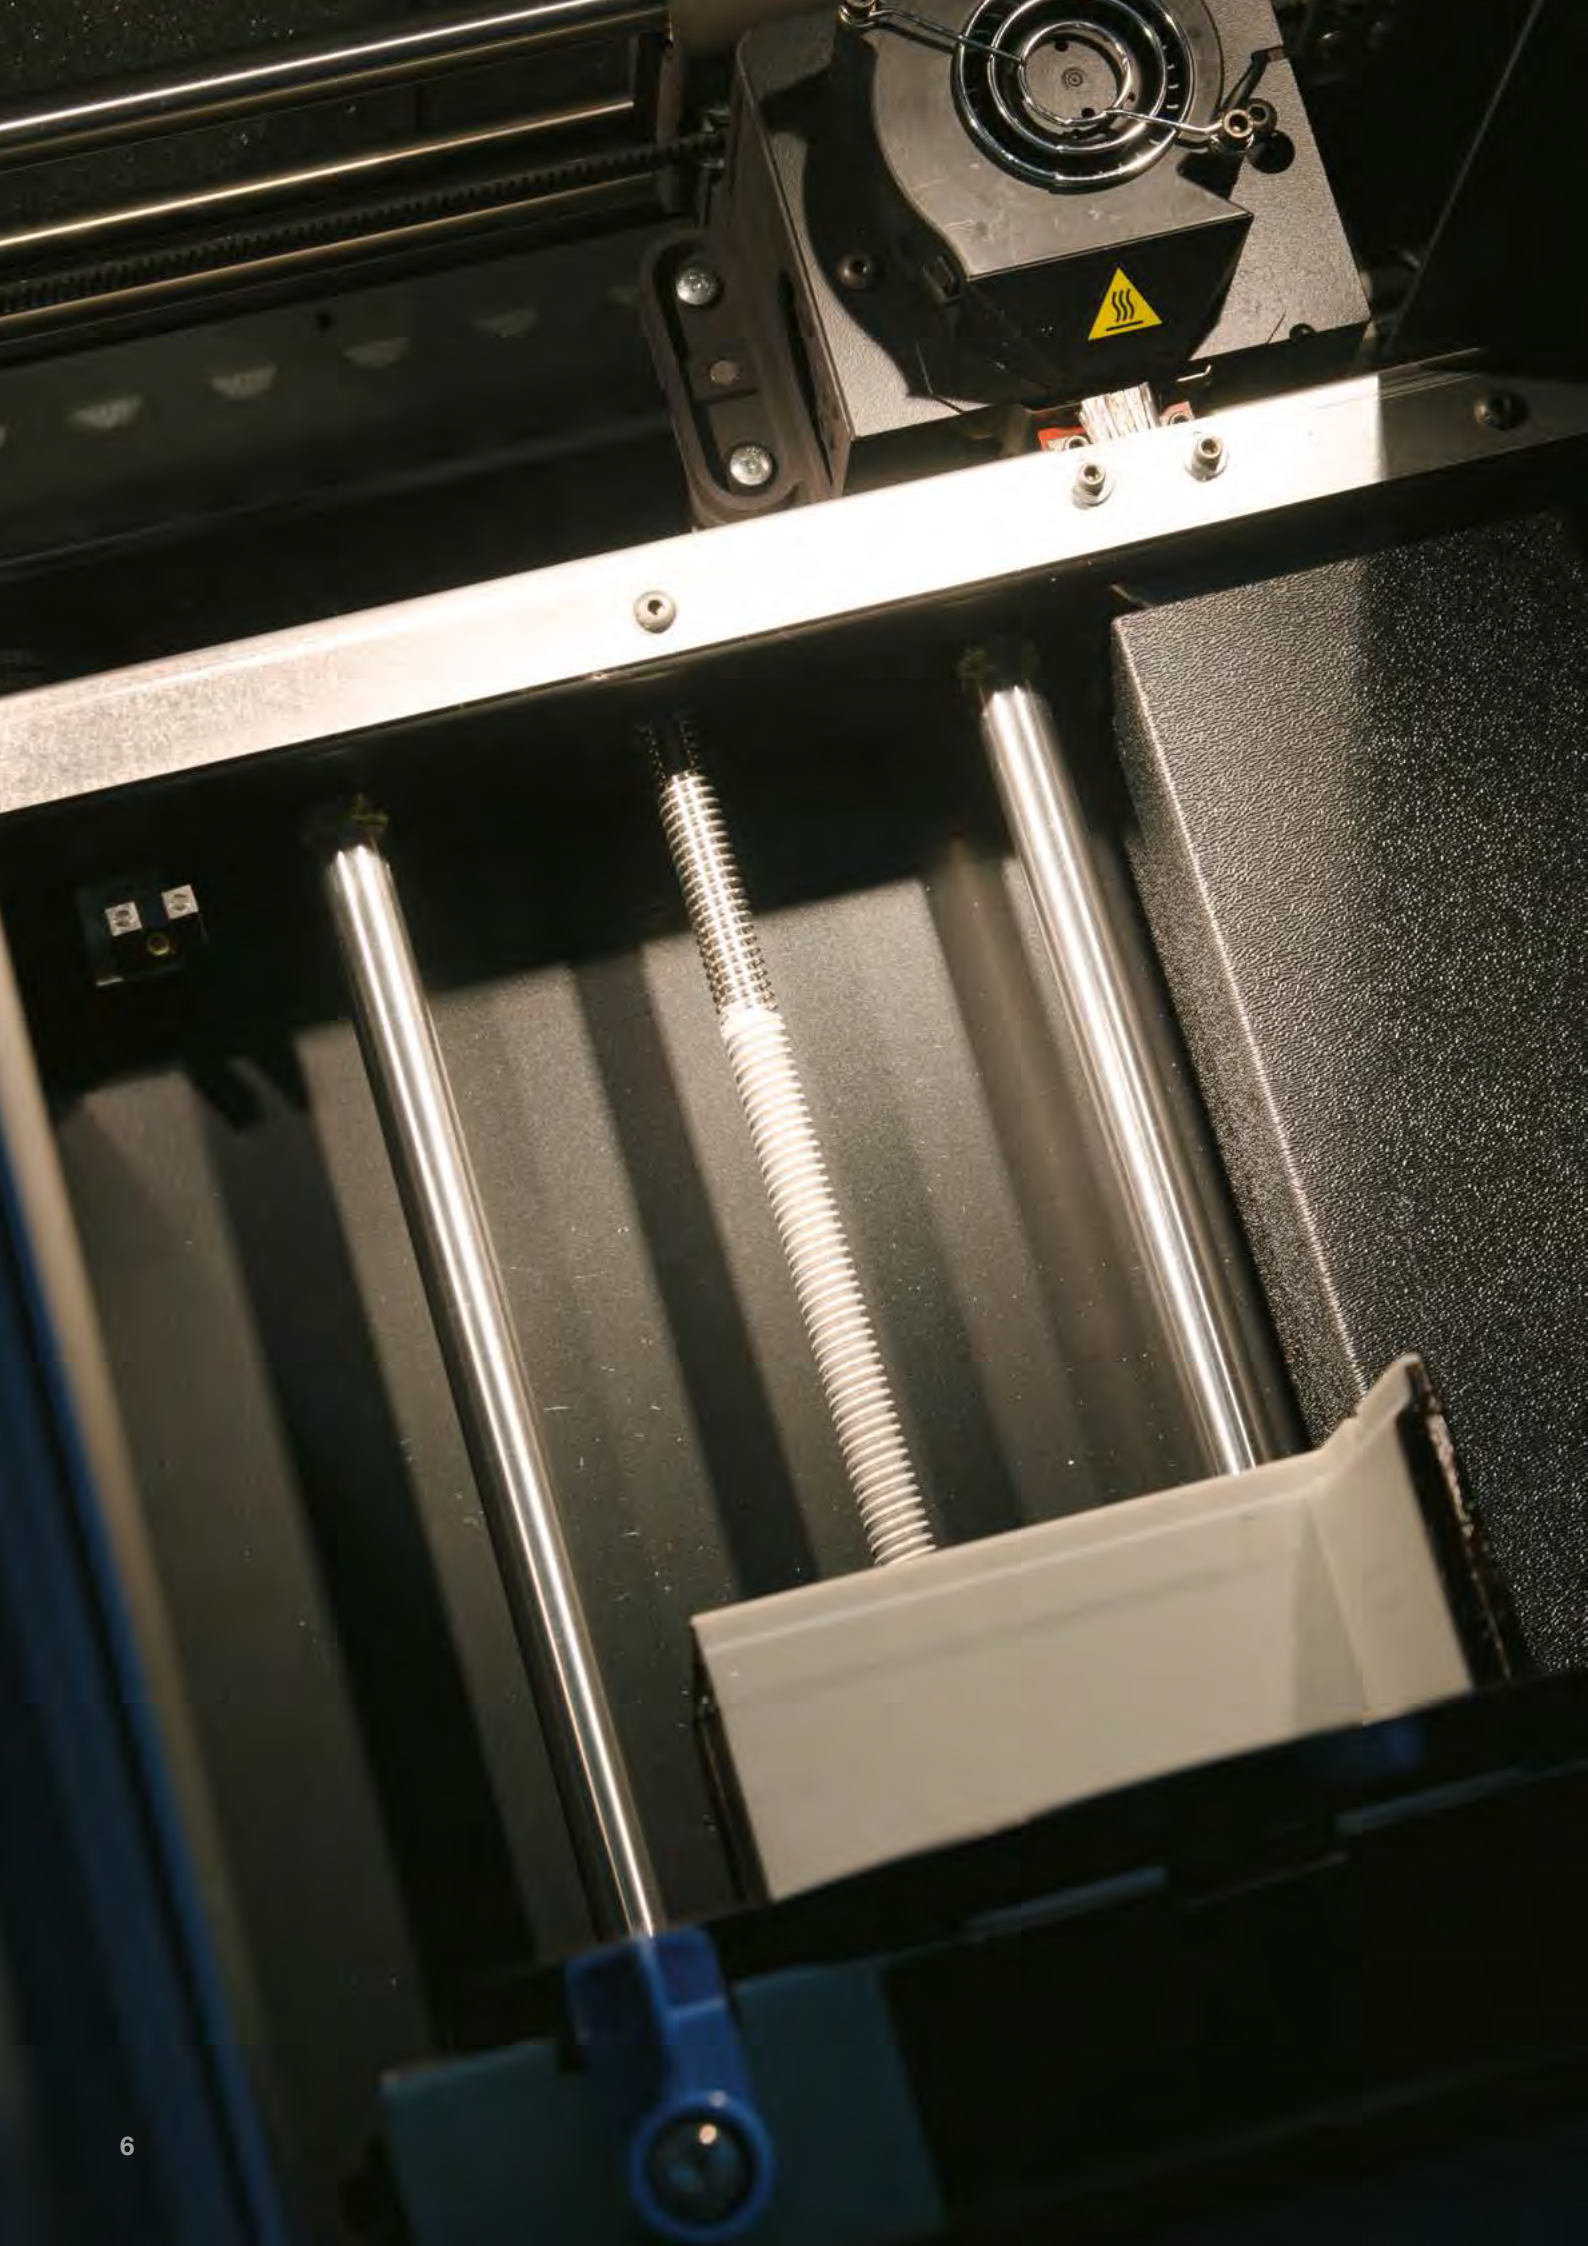
- Saving of fossil fuels
- Reduction of pollution and harmful emissions by exploiting the clean energy of the sun
- Reduction of the electrical energy loss that occurs through transmission. Once produced on site, the electricity is immediately consumed or delivered to the grid for others to use.
- Photovoltaic plants are very low maintenance and powered by the sun. The efficient panels produce energy during daylight hours. Even under less than optimal conditions, they continue generating power.

QUALITY

Our quality begins with our Design. Our young and energetic technical department develops functional and high quality products using customer input, creativity and the latest in 3D simulation and graphic programs.
The technical engineering team optimizes production and all employees receive extensive training insuring only the best quality.

In 2007, FAMI Srl began implementing a safety and management system in our workplace, complying with “Lavoro Sicuro” guidelines. In January 2008, Fami achieved the Management System validation from Confindustria Veneto and INAIL Direzione Veneto. We continue to apply this system every day. For Fami, safe working culture is an integral element for a dynamic and modern company.

ISO 9001 BUREAU VERITAS Certification



OUR MINDSET

WE INVENT

Awareness of the requirement for bespoke solutions, or putting our customer's ideas in to practice is our goal. Travel, observing the places we pass through with a curious eye, ready to be amazed and to grasp the sensations that will lead to intuitions of practical value. Travel, making observations in the places we visit , understanding the new environments give us the intuition to create a practical solution.

WE DESIGN

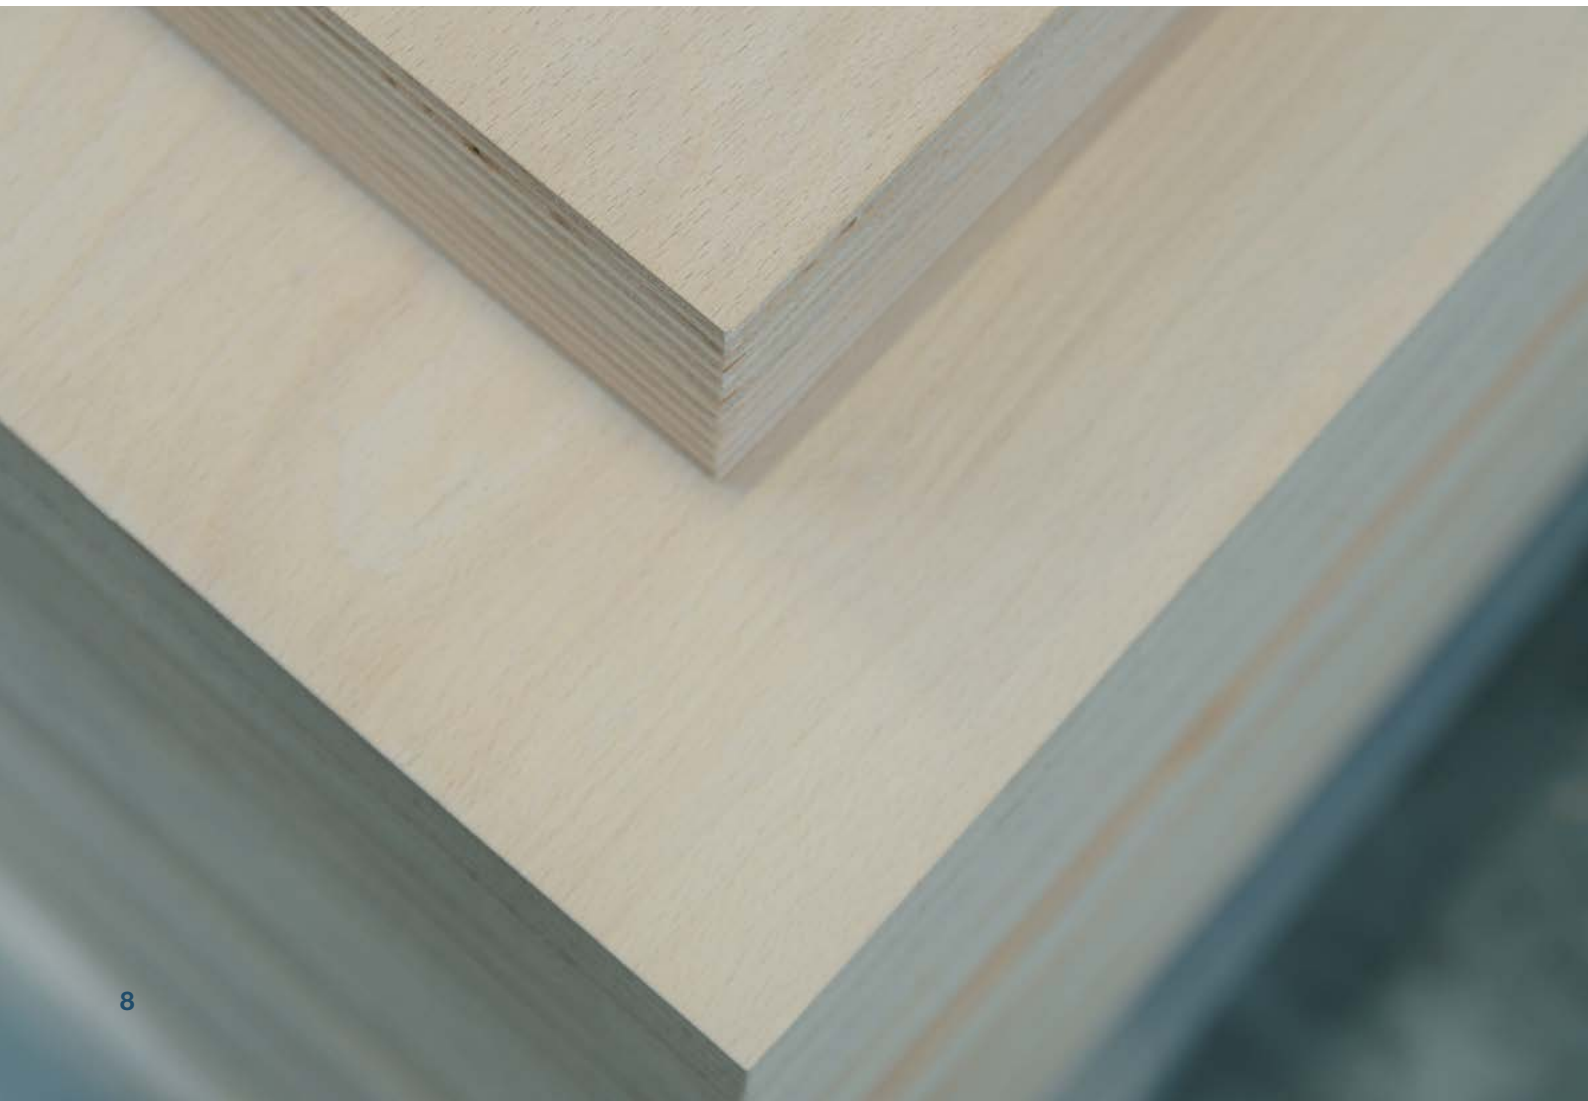
With computerized systems that enable us to view objects right to their core, with the craftsman's obsessive attention to detail, we create and re-create virtual objects that must be high-performing, attractive and, foremost, efficient. We develop and design customized systems for all logistical functions, never forgetting the fundamental qualities and characteristics of the material used, to obtain the object that was first imagined or desired. Highly qualified designers and state-of-the-art tools make the initial ideal into the real.

WE TRY AND TEST

Prototypes are built, tested, dismantled and reassembled an infinite number of times, until the object required is obtained. We use a very wide variety of materials, but mainly metal, plastic and wood.
We build equipment enabling us to simulate the stresses applied to products during use, to check their degree of resistance to lengthy conditions of stress and ensure that they are of excellent quality.
Innovative industrial storage systems, workstations and conductive systems for the electronics industry are extremely versatile products, allowing a wide range of applications and fulfilling their intended functions to the highest standards.

WE CREATE

With a craftsman-like flexibility and the efficiency of manufacturing on an industrial scale, we turn good ideas into reality with speed, vision and versatility, all qualities deeply imprinted in FAMI's heritage, which we never tire of applying.
The experience acquired over many years at work is constantly activated and used to implement new solutions, new technologies and new processes. This enable us to stay at the top of our sector. The result is a durable, attractive, perfectly ergonomic and absolutely user- friendly product. There is a particular focus on product quality, certified in accordance with the latest international standards.



WHAT WE USE

PLASTIC

A material that evokes the idea of modernity thanks to its ductility and versatility, symbolizes the Italian flair for synthesis and invention; for container manufacture, it has largely replaced the metal so fashionable in the sparkling post-War years.

Labour-saving shapes, carefully styled details and fine finishing are just some of the aspects that come to the fore with this material, not to mention the spectrum of colour that can be applied. Every product is inspected and checked with care before delivery to the customer.

METAL

Sheet metal is without a doubt the foundation on which FAMI's destiny has been built, and the key to our success. Originally processed with rudimentary hand tools, over time it began to be cut, shaped and assembled by the brute force of the first presses, but now, with the advent of electronics, it undergoes innovative production processes during which the metal is shaped, drilled, assembled and coated to deliver exclusive products.

Thanks to the use of industrialized manufacturing processes, state-of-the-art technologies and the staff's peerless professional expertise, Fami's plants take in the raw material and turn out the finished, high-performance object the customer expects from us.

WOOD

Wood has always been a living material, and as such, it must be handled with great care during processing.

In-depth knowledge is required to choose the correct cutting direction, the right equipment to shape it, and the appropriate coatings to make the most of all its characteristics.

The types of timber used are of the highest quality: beech, a very hard, tough wood, is ideal for contact with metal parts while birch, exceptionally strong for its weight, is used for van interiors.

PRODUCTION PROCESSES

PLASTIC

A blend of various “grains” and colors, heated to produce a smooth, malleable mix, it is injected into the mold to take on the required shape and become a box, a trim or a mechanical component. This process can be modulated by varying a myriad of parameters, skilfully managed with passion by the Fami staff.

The molding machines and molds, the heart of the production process, are interlinked by means of silos, roller ways, inspection stations, and technical and sales information that makes up the company’s value chain. Before being placed on the market, every product is tested and inspected for flaws; after passing these exams, it is made available to the customer.

METAL

Making full use of the possibilities of leading-edge technology, both automation and production management and focusing above all on the dynamics of “best practice” are the key resources of a successful company.

The metal division has all the equipment needed to transform a plain sheet of metal into a finished, functioning item: Automatic processing lines, robotic assembly systems and automatic coating plants are just some of the tools available to the Fami production group.

The key to this success is the skilled staff, drive the company forward developing better and more efficient metal working solutions. They are the essential power house that accelerates our growth.

WOOD

Woodworking is also highly mechanized, using a numerically controlled machining center which processes the piece to obtain the component required in a series of programmed operations.

The wood is moved to the processing line presses, where robots pick it up and load it into the machines for processing, while other robots automatically change the tools needed for the insertion of threaded inserts, the drilling of locator holes and shaping.

SYSTEM

STOREVAN

Store Van was founded in 2003 to respond to the very precise market of fitting out and customization of commercial vehicles.
Store Van, with its dedicated design and production departments, is as innovative as Fami, whose philosophy and managerial approach it shares. Store Van operates all over Italy and Europe and has set its sights on continued expansion. As a brand of the Fami Group, the flexibility of its products is a source of pride within the industrial group and helps ensure its position as a solid partner for its customers. Increased production efficiency and high quality yield are of great importance for all companies, and it is in this light that Store Van offers a range of accessories for the fitting out of a wide variety of commercial vehicles. Store Van studies, designs and manufactures the products and fits out all the interior spaces, making use of Innovative accessories specially made to measure for all types of vehicles.

FURGOMARKET

FURGOmarket is a Fami S.r.l. registered trademark that promotes the online sale of vans, trucks and other commercial vehicles, working with the industry's best dealers and experts.
All the dealers selected by FURGOmarket in cooperation with the auto manufacturers are able to publish their advertisements, to provide customers greater security when purchase a van on the FURGOmarket portal.

Choose FURGOmarket! You will find official advertising campaigns by the best automotive producers relating not only to the vehicles themselves but also to their internal and external fittings. A complete package delivering a quality service, an opportunity for filling the gap still felt in Italy in the online promotion of commercial vehicles.

www.furgomarket.it

FAMI SCHOOL

The design and production of UP school furniture was a great challenge for the FAMI School team.
We immediately liked the idea of being able to offer an ergonomic, adjustable desk and chair, able to adapt to children's rapidly growing bodies. The design and development of an industrial product for use in schools required constant research into materials and adjustments to the product's form and design, engineered for quality and able to meet the price requirements of our target market.

www.famischool.it

KANDINSKY NEW YORK

GAM

GonzagArredi Montessori mantained the commercial structure of the cooperative company, and produces today equipment and furnitures for kids in infant toddlers, kindergartens, schools, libraries, day care, and Montessori educational materials. The company has always worked in cooperation with university professors and experts in the field of furniture and education. New range of products, efficiency and the ability to respond to custom requests are essential characteristics in order to supply adequately schools and cultural or social buildings.
Montessori Materials are recognised and approved by Association Montessori Internationale (AMI), which was founded in Amsterdam by Maria Montessori. Gonzagarredi is the only company in Italy whose products are certificated by AMI association.

www. gonzagarredi.com

SCHOOL FURNITURE - DESIGNED TO CREATE FUNCTIONAL SPACES

Gonzagarredi offers lines of furniture for primary and secondary schools in which nothing is left to chance, from an attractive appearance to the materials used. It collaborates with educational experts and teachers to draw up customised designs for every school, making the most of its strong points, to help every single child to learn and grow. Furniture and fittings are made from top-quality 100% safe, non-toxic materials.

OUTDOOR FURNITURE - ENVIRONMENTALLY FRIENDLY SPACES

Furnishing solutions for the playgrounds of crèches, nursery schools and educational farms to create places to be experienced, which guide and respond to children's diverse needs, helping them develop environmental and body awareness in relation to the surrounding space.

SMIF LINE - SOFT SPACES FOR FREE PLAY

The "Morbidi" are a line of soft shapes that can be mixed and matched in an extremely versatile way, designed to encourage the relational, sensory and motor development of children from 0 to 6 years. The surfaces are pleasant to touch, brightly coloured, easy to keep clean, PVC-free, fire resistant and nice to handle. The elements and structures feature a high degree of grip on the floor and can be arranged in vertical and horizontal combinations.

MONTESSORI - QUALITY FURNITURE AND MATERIALS

GAM truly represents the history of Montessori materials, because it was in collaboration with our firm that Maria Montessori produced her first materials. Today, GAM is one of only three companies in the world whose materials are approved by the AMI (Association Montessori Internationale). Our aim is to offer quality furniture and materials, to help and guide children in the development of their individual cognitive and learning capabilities, through materials and shapes with simple yet extremely functional, creative design.

LIBRARIES - OPTIMISED, FUNCTIONAL SPACES

Gonzagarredi creates multifunctional furnishing systems for libraries and buildings designed for cultural activities: book check-out counters, bookshelves, display shelves, containers, cupboards, tables and chairs. State-of-the-art materials and versatile furnishings make GAM the Italian company with the closest links to the world of libraries, with no fewer than three furniture lines: Modular, Simplicio and Epifano.

MASTER

The idea was born in 2009: to reinvent the concept of the cabinet.
To reinvent something you have to reinvent yourself.
Fami has rethought its own Research & Development department with mechanical and electronic engineers specialized in automation and project industrialization.

Drawer cabinet is designed to satisfy and adapt to customer needs. A product featuring unrivalled accuracy in production processes.
A perfect combination of technology and functionality aimed at optimising workflows.

CABINET MASTER

The care involved in the technical, technological and aesthetical design is the absolute uniqueness of this cabinet. This is the cabinet that contains more innovation, more efficiency, more patents.

TECHNOLOGY

SYLOGIK
smart solutions

The new Sylogik® technologies used in the cabinet requires a manufacturing and operational precision never seen before.

A result that is obtained with a series of investments:
- New automated lines
- Regeneration of existing lines
- Development of special machines

syFLEX

Patented opening system allowing the user to customise extension and load capacity.

syFRONT

Free Web to Print service for customising the labels to be affixed to the handle of the cabinet.

syCONTROL

Mechanical or electronic lock providing high anti-tamper protection.

VERTEBRATE BAR

It is the heart and the brain of the system.
It is the anti-tilt bar with Sylogik® technology.

- No rotation
- Anti-tilt system
- Deadbolt system for the closure of the anti-tilt bar
- Possibility to share access to the drawers in multiple groups

300
PROTOTYPES

1.000.000

4 YEARS
OF DEVELOPMENT

4
PATENTS

MECHANICAL SYSTEM

The mechanical control system of the locking device uses the technology Sylogik®.

PUSH TO OPEN

Compared to conventional systems that require the additional components on the front of the cabinet, the drawer opening is integrated into the cylinder. To open the drawer, just turn the key and press the cylinder lock. With less components in the mechanism, there is less chances of breakage.

ELECTRONIC SYSTEM

control - security - memory

- Locking with a numerical code
- Opening and closing cabinet with user code
- Download historical events
- With the pre-loaded programs you can interface to any card access management system

REPORTING SOFTWARE FOR LOGGING EVENTS

Free reporting software and can be downloaded from: www.sylogik.com/sycontrol
Display the last 1000 events with date, time, user, and type of event. To maintain control over every opening, every access.

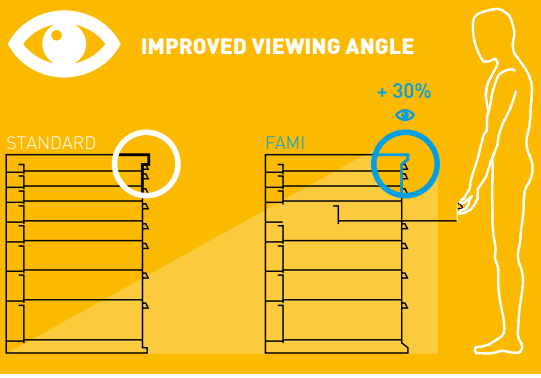
FRONT
BEARINGS

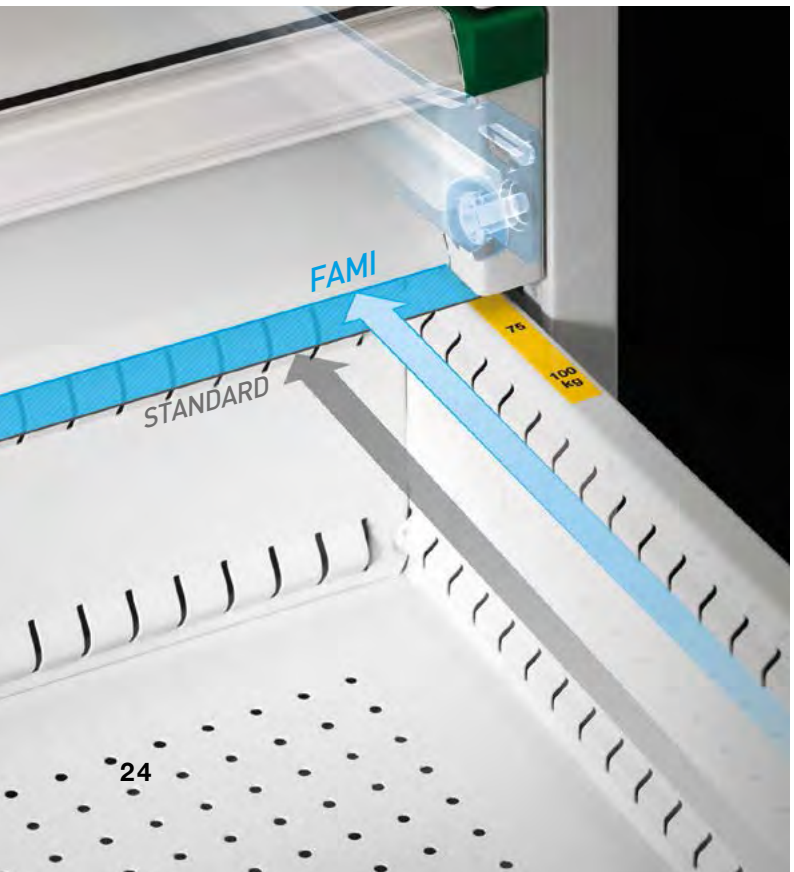
The first cabinet in the world with front bearings.

SIMPLER MECHANISM
= MORE EFFECTIVE

The simple guide has been lengthened to the cabinet depth. The front bearing has been positioned in front of the drawer. Result: significant improvement in the percentage of extraction and use of the volume of the drawer. The shadow cone is zero in the upper drawers even if they are set to the 100 kg capacity.

- **More space usage**
- **Easier movement**
- **Increased drawer extraction**



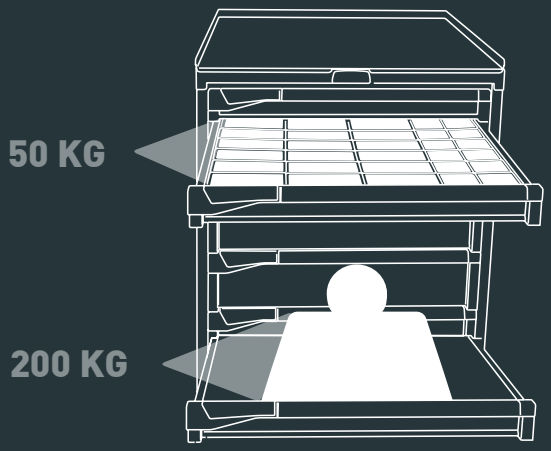


FREELY
CONFIGURABLE

New extraction guide with 3 simple mechanical adjustments positions at the rear lock of the drawer. Enables 3 different load ratings: 50, 75, 100 kg. On the same drawer you can mount a new telescopic guide (200 kg capacity).

freely reconfigurable

Load Rating and extraction with drawer fronts of the same height are reconfigurable without requiring the intervention of a technician.



WEB
TO PRINT

Load Rating and extraction with drawer fronts of the same height are reconfigurable without requiring the intervention of a technician.

- **Personalize with aesthetic and decorative elements**
- **User input: labels for describing and cataloging the contents**
- **Output User: ability to insert descriptive or visual messages on the handle**

active communication

The innovative handle on the left side of the drawer has a unique and unprecedented characteristic: a label holder opening from the front. It can accommodate messages and information that the owner of the cabinet wants to communicate to the user. A space separate from label-holder, to give maximum emphasis to every message.

www.sylogik.com/syfront

■ CAST IRON VICE JAW WIDTH 80 MM

ITEM NO.	suitable for
F BL 1010 00 00	wooden worktop
F BL 1010 01 00	steel worktop

A = 100 mm
B = 330 mm
C = 80 mm
D = 83 mm
E = knurled
G = 4 kg

■ CAST IRON VICE JAW WIDTH 110 MM

ITEM NO.	suitable for
F BL 1015 00 00	wooden worktop
F BL 1015 01 00	steel worktop

A = 120 mm
B = 385 mm
C = 110 mm
D = 113 mm
E = knurled
G = 7 kg

■ CAST IRON VICE JAW WIDTH 120 MM

ITEM NO.	suitable for
F BL 1065 00 00	wooden worktop
F BL 1065 01 00	steel worktop

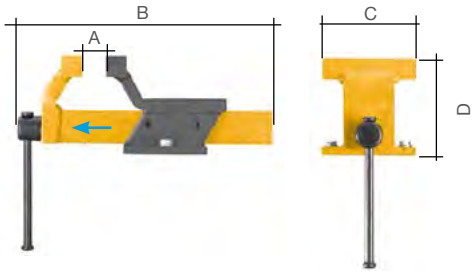
A = 175 mm
B = 510 mm
C = 120 mm
D = 187 mm
E = knurled
G = 16 kg

■ CAST IRON VICE JAW WIDTH 130 MM

ITEM NO.	suitable for
F BL 1020 00 00	wooden worktop
F BL 1020 01 00	steel worktop

A = 140 mm
B = 430 mm
C = 130 mm
D = 137 mm
E = knurled
G = 11 kg

■ FRONT OPENING



A = maximum jaw opening
B = maximum width of vice
C = width of jaws
D = height of vice
E = knurled jaws
G = weight of vice

■ CAST IRON VICE JAW WIDTH 100 MM

ITEM NO.	suitable for
F BL 1110 00 00	wooden worktop
F BL 1110 01 00	steel worktop

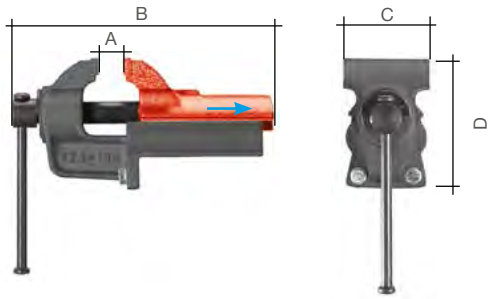
A = 140 mm
B = 445 mm
C = 100 mm
D = 153 mm
E = knurled
G = 11 kg
Can not be assembled on 30 mm thickness worktops

■ CAST IRON VICE JAW WIDTH 120 MM

ITEM NO.	suitable for
F BL 1120 00 00	wooden worktop
F BL 1120 01 00	steel worktop

A = 185 mm
B = 520 mm
C = 120 mm
D = 180 mm
E = knurled
G = 18 kg
Can not be assembled on 30 mm thickness worktops

■ REAR OPENING



■ CAST IRON VICE JAW WIDTH 150 MM

ITEM NO.	suitable for
F BL 1130 00 00	wooden worktop
F BL 1130 01 00	steel worktop

A = 220 mm
B = 615 mm
C = 150 mm
D = 210 mm
E = knurled
G = 25 kg
For wooden worktops 50 mm h only

A = maximum jaw opening
B = maximum width of vice
C = width of jaws
D = height of vice
E = knurled jaws
G = weight of vice

ITEM NO. **F QZ 1211 00 07**

SWIVEL CHAIR with double swivel wheels, seat and back in beech-plywood.
Seat height adjustable by pneumatic height adjustment.
Height: from mm 470 to mm 645.
COLOUR BLACK RAL 9011

ITEM NO. **F QZ 1210 00 07**

SWIVEL CHAIR with low noise floor feet, seat and back in beech-plywood.
Seat height adjustable by pneumatic height adjustment.
Height: from mm 445 to mm 625.
COLOUR BLACK RAL 9011

ITEM NO. **F QZ 1220 00 07**

SWIVEL CHAIR with low noise floor feet and additional chromium-plated foot rest, height adjustable.
Seat and back in beech-plywood.
Seat height adjustable by pneumatic height adjustment.
Height: from mm 510 to mm 760.
COLOUR BLACK RAL 9011

ITEM NO. **F QZ 1130 00 07**

SWIVEL CHAIR with low noise floor feet, seat and back in beech-plywood.
Seat height adjustable by molomatic screw.
Height: from mm 425 to mm 565.

FULL EXTENSION SUSPENSION FOLDER FRAME FOR SUSPENSION FOLDER DIN A4

The suspension folder frames are supplied with full extension guide rails (100% extraction) with 30 kg load capacity. Overall dimensions 990x500 mm.
These frames can only be used for 1000 mm long and 500 mm deep bays. Available in black Ral 9011.

ITEM NO. **F ST 7850 00 07**

NORMAL EXTENSION AND FULL EXTENSION DRAWERS

The drawers are available either with normal extension (88% extraction) or full extension (100% extraction) guide rails with a front height of 100 mm.
The slotted internal side walls and perforated bottom with 17 mm fixed increments make the metal partitions easy to be inserted and fixed (with screws).
They are made from sheet steel and can only be used for 1000 mm long and 500 mm deep bays. Available blue Ral 5012 or grey Ral 7035.

CONNECTING BAR BETWEEN SHELVING UNITS

Fitting the connection bar into the upright

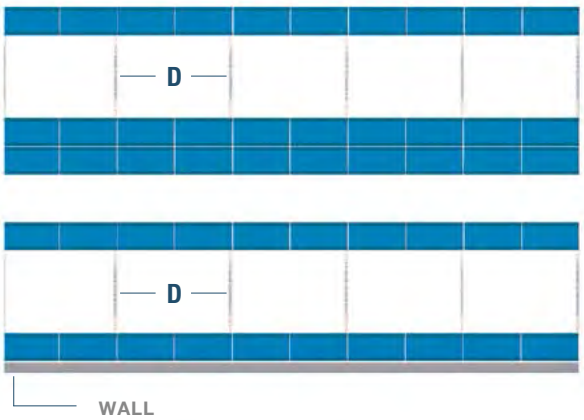
AISLES:

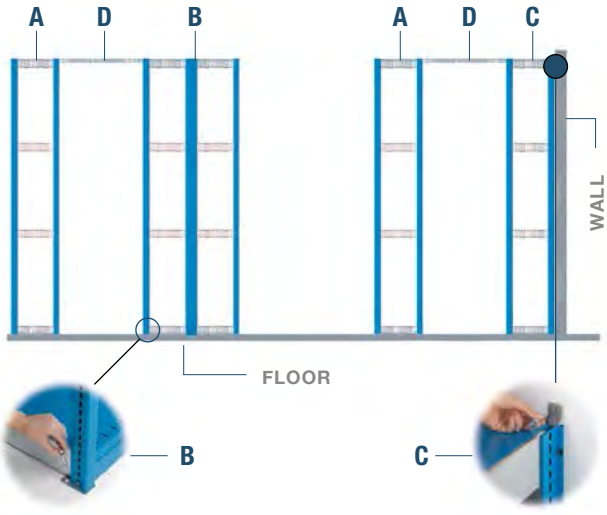
If the layout of the shelving system includes aisles, metal or mesh panels must be fitted on all the sides that are not used for picking up or setting down the material. These aisles must have the following widths:

- Aisles used for manually picking up or setting down material from the shelving without drawers. Manually pushed trolleys may not be used: minimum width 800 mm.
- Aiseles used for picking up or setting down material from the shelving through manually pushed trolleys (shelving system with or without drawers): minimum width 1250 mm.
- Aisles used for staff transit: minimum width 1250 mm.

Aisles used for picking up or setting down material cannot be used for staff transit. If aisles are required to be used for the transit of powered trolleys, please contact FAMI for further details.

Caution: for back to back shelving, back panels, mesh back panels or shelf stoppers must be mounted between the two shelving units in order to prevent the material stored on one side of the shelving from being accidentally pushed to the other side when material is being set down.





Caution: connection bars must be used for wall-fixed upright frames if these cannot be fixed to the wall. In this case the upright frame in question must be connected to a back to back upright frame which is either fixed to the floor or has one upright frame fixed to the wall.

To calculate the number of connection bars required to connect two shelving units, please see the above figure.

- The external upright frames must always be connected.
- The internal upright frames must be connected every two bays.

A = Upright frame fixed with a connection bar.
B = Back to back upright frames fixed to the floor.
C = Single upright frame fixed to the wall.
D = Upper safety connecting bar.

SECURITY

DOUBLE LOCKING SAFETY MECHANISM

The shelving system is fitted with a double locking system to allow only one shelf to be pulled out at one time.
The anti-tilt system is based on a bar with safety catches fitted to each upright.
Each shelf is fitted with an individual safety catch.
The anti-tilt system prevents the movement of any stored items.

RETRACTABLE SHELF CATCH

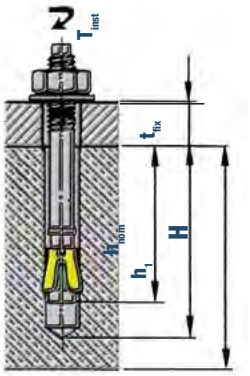
The safety catch locks the shelf into normal or retracted position. This feature prevents the movement of the shelf during handling of stored items.

catch for normal extension shelves

catch for full extension shelves

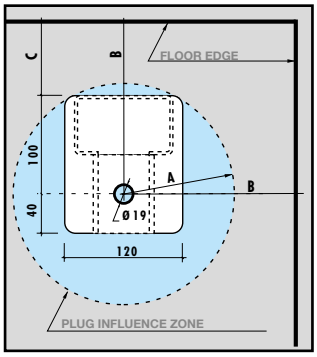
FLOOR SUPPORT PLATE

The floor support plate distributes the weight pressure imposed by the upright onto the floor surface
A technical chart showing flooring and surface requirements is supplied by FAMI.
The floor support plate has a fixing hole to allow anchorage to the floor with raw bolts supplied as standard. “Floor fixing” forms part of the basic safety requirements.



Recommended raw bolt tension	11,65 KN	Min. surface thickness for raw bolt fixing *	H: 160 mm
Raw bolt diameter	Ø 16 mm	Min. distance of raw bolt from surface edge	B: 175 mm
Hole diameter in concrete	Ø 16 mm	Raw bolt influence area or centre distance ** **	A: 112,5 mm
Minimum hole depth	h_1 115 mm	Min dist. of upright from surface edge	C: 75 mm
Minimum fitting depth	h_{nom} 95 mm		
Max fixable thickness	t_{fix} 25 mm		
Max torque setting	T_{inst} 125 NM		

* It is compulsory that the floor surface has sufficient strength to maintain the shelving weight and floor pressure. The surface must be of sufficient strength to allow for raw bolts to be fitted to the floor.
** The area must remain free of any other force.



SHELF LOAD CAPACITY

A label stating load capacity for evenly distributed weight is fitted to each shelf.

Example of retractable shelf load label supplied as standard

Example of top shelf load label supplied as standard

LOAD CAPACITY PER SINGLE BAY

The shelving system is supplied with a weight loading table to ensure correct loading.
The table indicates:

- the type of shelving
- the year of manufacture
- manufacturer’s internal reference number
- load capacity per bay excluding bay weight

Example of a standard load table

INSTRUCTIONS HANDBOOK

A complete and detailed instructions handbook is supplied standard with the shelving system.
This contains the following information:

- technical data
- intended use
- safety information and residue risk areas
- technical table for calculating the required floor strenght
- installation and assembly instructions
- fixing instructions.

NORMAL EXTENSION

■ A cross bracing must be fitted to each second bay

SINGLE DRAWER OPENING SYSTEM

The single drawer opening system forms a standard part of this shelving system. The system prevents the operator from retracting more than one shelf at one time. The system comprises a locking bar as the same height of the upright and one locking catch per retractable shelf. Each bay requires one locking bar and one safety catch per retractable shelf (hooks are standard supplied with the retractable shelf).
Standard colours grey Ral 7000 or green Ral 6011.

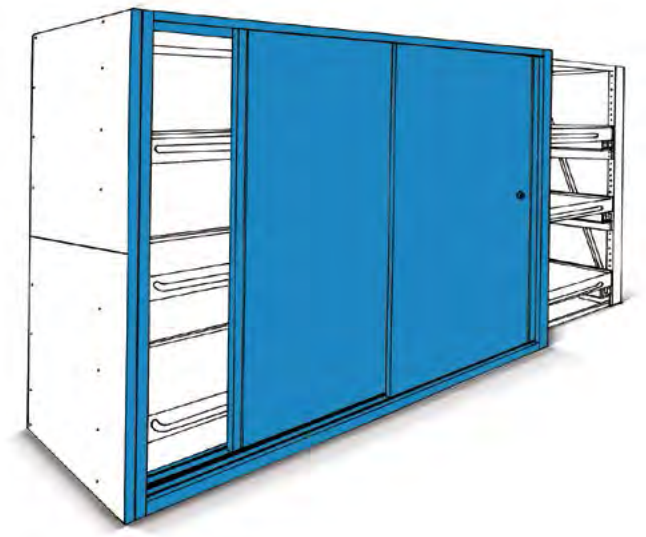
SLIDING DOORS

Supplied with cylinder lock and 2 keys



■ This type of door closes 2 bays

INSTRUCTIONS HANDBOOK

A complete and detailed instructions handbook is supplied standard with the shelving system.

This contains the following information:

- technical data
- intended use
- safety information and residue risk areas
- technical table for calculating the required floor strenght
- installation and assembly instructions
- fixing instructions.

SPARE KEY

Always indicate the number on the cylinder lock of the key to be replaced.

ITEM NO. **R CSC 0002 00**

PASSEPARTOUT

This type of key opens all the 45 and 46 series locks.

ITEM NO. **R CSC 0001 00**

LOAD TABLE

A load table is supplied on request with each shelving system.

The load table must be attached to a perfectly visible part of the shelving and shows:

- load capacity per bay
- load capacity of shelves and drawers
- max. distance between universal shelves
- max. distance between locking shelves

Example of load capacity table supplied on request

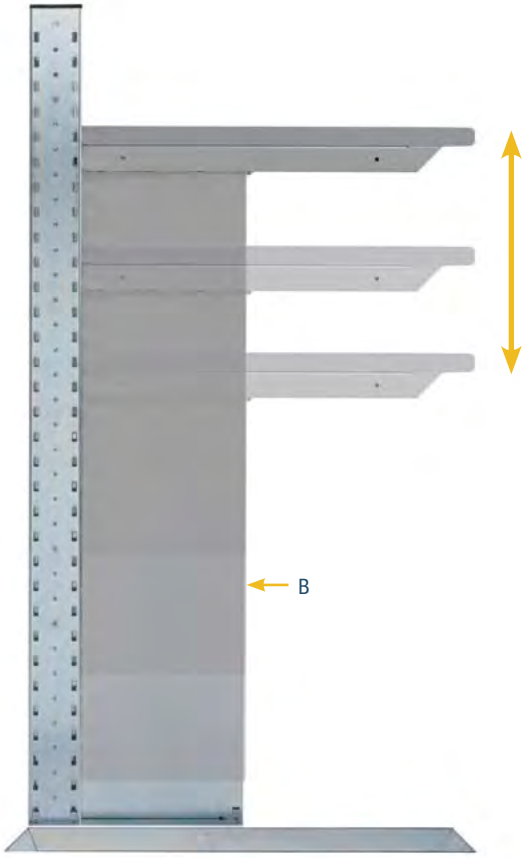
WORKSTATION SERIES DYNAMIC
DIMENSIONS: 3522x1500x2220 mm h
COMPLETE OF: shelves - containers - boxes - perforated panels - supports with aluminium tracks - drawer cabinets - chairs
Not included: pneumatic systems - electrical systems - lamps - tools and electrical tools.
COLOUR GALVANIZED + GREY RAL 7035

- Workstations are supplied not assembled and must be fixed to the wall or floor
- All indicated loads are net and refer to evenly distributed weights

THE BASE OF THE **DYNAMIC** SERIES WORKSTATIONS IS FITTED WITH FEET THAT ARE ADJUSTABLE IN HEIGHT FROM 0 TO 10 mm.



THE HEIGHT OF THE WORKTOPS OF THE **DYNAMIC** SERIES WORKSTATIONS CAN BE SET IN THE ASSEMBLY PHASE THANKS TO THE EXTENSIBLE SUPPORT (REF. B) FROM 720 mm TO 1138 mm.

IN THE **DYNAMIC** SERIES WORKSTATIONS THERE ARE TWO GROOVES ON THE FRAME UNDER THE WORKTOP SO THE FLEXA SERIES CABINETS CAN BE INSTALLED AND CAN SLIDE TO THE RIGHT OR TO THE LEFT, USING THE SPECIAL SUPPORTS.

TRIPLE-JOINTED WALDMANN LAMP 1X36 W IP 20

Technical specifications of the lamp:
aluminium casing, metallic parabolic diffuser, protection rating IP 20, neon 1x36W, electrical input 230V/50Hz, power supply plug Schuko, cable length 1,95 metres, tonality 4000K, colour rendering (Ra) 80-89.
Fixing material included.
The standard lighting system includes:
1 multipurpose steel support for fixing to clamp, 1 clamp 0-65 mm, 1 swivel lamp with three joints.

Standard IP 30 protection rating electrical components supplied:

2 multiple socket boxes with 12 modules
1 magnetothermic differential circuit breaker 2P 230V AC10A I Δ N=0.01A
2 cable clamps PG11
1 cable clamp PG16
2 straight connectors PG16
200 200 cm cable sheath Ø 16 mm
1 heavy duty fixed plug 220-250V 16A 2P+T
1 complete wiring for 6-9 sockets (depending on the article)
6-9 sockets 220-250V 10A 2P+T with hole covers (depending on the article)

FAMI

STORAGE ESD

FAMI Athena conductive containers are produced in conductive plastic in basic sizes of 600x400 mm and 400x300 mm, with a variety of depths.

These base measuremets are subdivisions of the 1200x800 mm Europallet, and as such create a standard modular system.

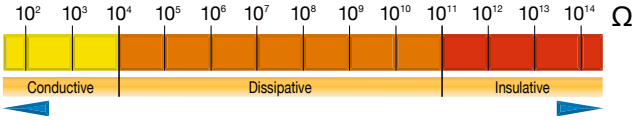
The special external ribbing makes the FAMI system particularly robust, especially when stacked.

Side handles make handling safe and easy, and the lid, whilst protecting the contents from dust and dirt, does not inhibit stacking.

The smooth internal design makes cleaning easy and the special base allows for the use of the containers on any style of conveyors.

The FAMI series of containers are designed to accept both the Megaprint® and Miniprint® systems and to keep safe all types of electronic components from electrostatic damage.

CONDUCTIVITY SCALE



TECHNICAL SPECIFICATIONS

Base material	Polypropylene copolymer (PPC)
Conductivity additive	Carbon black
Colour	Black
Density, at 23°C	1.04 g/cm³
Vicat softening point	154°C ISO 306
Working temperature	
continuous	approx 80-100°C
short term	approx 100-120°C
Surface resistance	less than 10^4 Ω cm (measured according to CEI EN 61340-2-3 at 20°C with a 5 cm² ring electrode).
Volume resistivity	10^4 Ω cm (measured according to CEI EN 61340-2-3 at 20°C with a 5 cm² ring electrode)
Ageing behaviour	No deterioration of conductivity (in 7 years of service), no leaching of corrosive substances, excellent UV resistance.
Chemical resistance	Excellent (according to the generally valid PP classification)

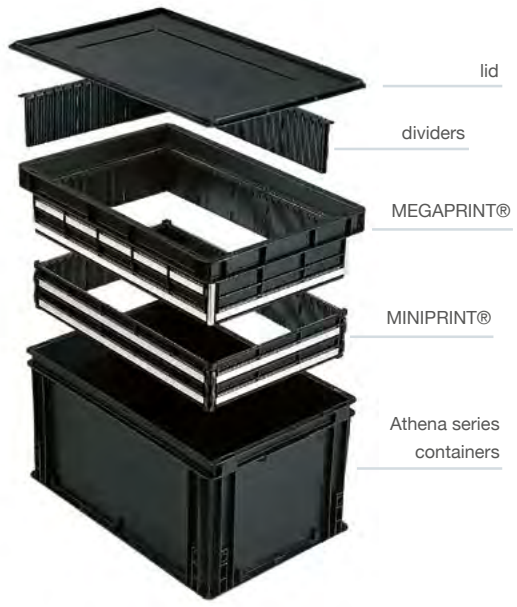
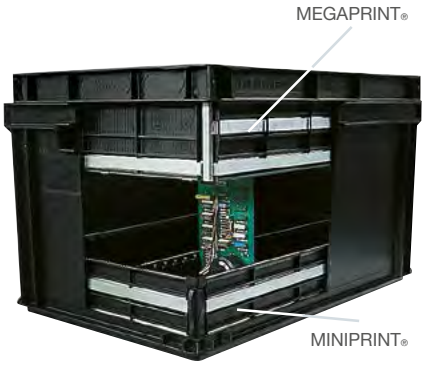
P.C.B. HANDLING FRAME SYSTEM (MEGAPRINT® – MINIPRINT®)

A complete range of conductive products has been designed and produced by FAMI, in order to satisfy in a safe and logical manner all the problems of the electronics industry. Simplistic and modular designs characterise the FAMI products in this field, with actual solutions for the productions, storage, transportation, repair or maintenance of P.C.B.'s and various electronic components. For the manufacture of products, FAMI utilize conductive materials of top quality, which offers an ideal and total protection from electrostatic charges or mechanical damage. The FAMI card systems have been found to be ideal used in the sectors of electro/mechanical, electronics, mines as well as in the manufacturing of explosives.





CARD CARRYING SYSTEM

The card carrying frames make up an integral part of the FAMI P.C.B. carrying systems, and are used in the production, storage and transportation of P.C.B.'s. They are formed essentially of two lateral walls and a central fixed wall between them and aluminium guides. These frames can be used either inserted in the containers or as a totally independant system. Apart from the standardized container insertion dimensions, the system is flexible and permits variable measurements depending upon the length of the guides. The frame can be used in a vertical, horizontal or flat position, and they can be stacked providing they are of equal dimensions. Also if the frame is compatible, the precision of the solution is such as to permit the use in either manual or robotic application.

DELIVERY FROM STOCK

Fami has selected a series of products, identified by the “D code”, to be constantly available from stock to cover our customers’ urgent requirements. We have selected a wide range of articles: cabinets, workbenches, shelves, trolleys, drawer units, boxes and plastic containers.

A quick look at the catalogue in the FAST section will reveal the many standard products available, bearing in mind that these terms are only available for the colour, model and composition shown.

STEEL HANDLE WITH SUPPORTS
COLOUR BLACK

ITEM NO. **D 93108 07**

PAIR OF PLINTHS 200 mm h

THE CABINET MUST BE FIXED TO THE FLOOR

Height allows for a large server computer

Adjust the external length of the power cable by unscrewing the relative cable holder. The dual protection power cable is 3 metres long.

The electrical system (protected by IP 30) of each computer cabinet is supplied with a 230V 10A circuit breaker and tested with a special tester according to the CEI EN 60204-1, with the following tests:
- continuity of the earth circuit
- applied voltage
- insulation resistance

The retractable keyboard shelf can be locked in two different positions and it is generously sized to allow for work accessories and make it more comfortable to use the keyboard. 1 mouse pad, 2 floor brackets, 12 plastic caps and 2 levelling devices are supplied standard with the cabinet.

ITEM NO. **D 93344 08**

LOCKER
with 1 compartment. CYLINDER LOCK.
